Summary — Detail-oriented SQA Engineer experienced in manual and automation testing of web applications. Skilled in designing and executing test cases, developing automation scripts using Python and Playwright, and identifying and reporting software defects. Experienced in Agile/Scrum environments with hands-on knowledge of Linear for issue tracking. Familiar with API and performance testing, regression testing, and modern QA practices to enhance software quality and reliability.

Education

B.Sc. in Computer Science and Engineering 2021-2025, 3.84/4.00
Green University of Bangladesh

Work Experience

Octopi-Digital Limited July 2026 – Present
Junior SQA Engineer

- Perform manual testing across OptimalMD and multiple in-house projects, covering functional, regression, and exploratory testing to ensure application quality and usability.
- Design, develop, and execute automated test scripts for the OptimalMD staging platform using Python and Playwright to validate application functionality.
- Identify, document, and track software defects using Linear, providing detailed bug reports and collaborating with developers to ensure timely resolution and continuous product improvement.

Join Venture AI July 2025 – June 2026
Jr. SQA Engineer

- Performed manual and automation testing of web and mobile applications using Playwright, designing and executing test cases for functional, regression, and cross-platform testing.
- Conducted API testing using Postman and performance testing using Apache JMeter to evaluate application functionality, reliability, and performance.
- Analyzed business requirements and technical specifications to prepare test documentation, identify defects, and collaborate with developers and cross-functional teams in Agile environments to ensure product quality.

QA Harbor Limited March 2025 – June 2025
SQA Intern

- Supported manual testing of web and mobile applications by designing and executing test scenarios, assisted in Selenium automation setup, participated in security testing, and collaborated within Agile teams to identify defects and improve application quality.

Skills

Technical Skills

- **Testing:** Manual, Automation, Functional, Regression, Smoke, Usability, API, Load, Stress, Database
- **Automation Tools:** Playwright, Selenium WebDriver
- **API & Performance Tools:** Postman, Apache Jmeter
- **Test Management / Bug Tracking:** Linear, Jira
- **Programming Languages:** Java, Python, C/C++
- **Backend:** MySQL
- **IDEs / Dev Tools:** Visual Studio Code, IntelliJ IDEs
- **Version Control:** Git, GitHub
- **Operating Systems:** Linux (Ubuntu), Windows, MacOS
- **Productivity Tools:** MS Office(Word, Excel, PowerPoint), LibreOffice, Adobe (Photo Shop, Light Room), Canva
- **Others:** Agile, Scrum, SDLC, STLC, CI/CD (basic), SQL

Soft Skills

Problem-Solving • Communication • Team Collaboration • Critical Thinking • Leadership • Time Management

Language Skills

- **English:** Proficient (Written and Spoken)
- **Bengali:** Native Speaker

Projects

OptimalMD Member Portal – Test Automation Suite Github Demo Video

– Built a Playwright + pytest automation suite (Page Object Model) for a healthcare portal, covering registration, Stripe payments, email/OTP verification over IMAP, profile activation, dashboard services and dependents. It runs 30+ tests in under 5 minutes, with a custom Flask runner that shows a live browser view and step-by-step results.

Advantage Shopping Test Suite Bug Report Github Link

– Performed both manual and automated testing for the Advantage Shopping web application using Playwright with Python. Designed and executed test cases to validate functionality, identify bugs, and ensure cross-browser compatibility.

Restful-booker API (API Testing) Github Link

– Performed API testing on the Restful Booker API by automating authentication and booking CRUD workflows. Used dynamic variables with pre/post scripts, added assertions for response validation, and executed test collections with Newman to generate test reports.

Restful-booker API (Performance Testing) Github Link

– Performed API performance testing on the Restful Booker API using Apache JMeter, creating load test scenarios with assertions and pre/post-processors for dynamic data handling. Executed tests via CLI and generated HTML reports to analyze response time, throughput, and system performance.

Frontend Manual Testing – LuxuryOps Web Application Bug Report

– Conducted end-to-end manual testing by validating UI/UX, and usability. Identified and documented bugs in a structured report, focusing on UI/UX, and user experience inconsistencies, while strengthening skills in manual testing, test case design, and defect reporting.

Space Express Web Application (Manual Testing) Bug Report Feature List

– Performed end-to-end manual testing of the Space Express Web platform by validating core functional workflows and identifying defects. Analyzed business requirement documents and created a structured functional feature list to support requirement tracking, test planning, and quality assurance processes.

Quran Mobile App (Manual Testing) Bug Report

– Performed end-to-end functional testing of a mobile/web application by validating core features, identifying defects, and reporting bugs with clear reproduction steps. Ensured application quality through requirement-based test execution and defect tracking.

Academic Achievements

– **VC's Certificate:** Awarded for earning a GPA of 3.90–4.00 in Spring'23 & Spring'25.
– **Dean's Certificate:** Awarded for earning a GPA of 3.80–3.89 in Fall'21, Summer'22, Fall'23, Spring'24 & Fall'24.
– Received Best Computer Society Student Volunteer Award in Bangladesh in 2024.

Extracurricular Activities

Student Mentor, Department of CSE *Green University of Bangladesh*
January 2023 - December 2024

– Mentored more than 300 students, demonstrating strong communication and teaching skills while fostering a collaborative and positive learning environment. Gained valuable experience and personal growth through this role.

Chair, IEEE Computer Society Student Branch Chapter GUB *Green University of Bangladesh*
March 2024 - May 2025

– Organized and led over 26 technical workshops and events in 2024 on emerging technologies such as Artificial Intelligence (AI), Machine Learning (ML), and the Internet of Things (IoT), contributing significantly to the chapter being recognized as the Best Computer Society Student Branch Chapter in Bangladesh.

Volunteering

– Working as a volunteer in 6th International Conference on Sustainable Technologies for Industry 5.0 (STI 2024)
– Working as a lead volunteer in CSE Carnival 2024.
– Working as a volunteer in IEEE inauguration ceremony.
